Scaling up Antiretroviral Treatment - Potentials and Challenges in the Context of a comprehensive HIV/AIDS Health Care System in Tanzania

We are all committed to improving access to antiretroviral treatment – but how can we meet the challenge of providing treatment to people in need in a sustainable and equitable manner?

Objectives

- ⇒ Analyse national policies, roles and responsibilities of stakeholders as well as resources available at the national, regional and district level.
- ⇒ Discuss opportunities and challenges for scaling up ART, taking account of urgency versus sustainability and efficiency versus equity.
- ⇒ Discuss how to improve coordination of existing initiatives at the international level as well as coordination of partners contributing to the implementation of a national treatment strategy.

Topics and Speakers

Part I: International framework and methods of analysis for scaling up ART

- Dr. Charlie Gilks, Director of Country Scale-Up for 3 by 5, HIV/AIDS Department, WHO
- Dr. Assia Brandrup-Lukanow, Director, Division of Health, Education, Social Protection, GTZ

Part II: Potentials and challenges at different levels in ART implementation – focusing on Tanzania as a case study

- Dr. Rowland O. Swai, Manager National AIDS Control Programme at the Ministry of Health, Dar es Salaam, Tanzania
- Dr. Brigitte Jordan-Harder, Team Leader, Multi-sectoral AIDS Control Component, Tanzanian-German Health Support Programme, GTZ Tanzania
- Dr. Klint Nyamuryekung'e, National Professional Officer - HIV/AIDS, WHO Country Office Tanzania
